

# Team Updates

There is so much information around and new information emerging every day.

Keep everyone on your team on the same page by having a Zoom Meeting and covering the following:

- Current state of restrictions for the dental industry.
- Share important information, webinars, announcements from the ADA if you have access that other team members do not.
- Update of new infection control guidelines.
- HR, employment and Government payment information and how it applies to each team member.
- Ask how each team member is. Are they positive and happy or struggling? Be an encouraging support for one another during this time.
- Share the fun and interesting things everyone is doing.
