

Birthday Greetings from Your Dental Team!

Gather your team on a Zoom meeting and record a birthday greeting with everyone singing Happy Birthday.

There will be a report within your dental software that gives you a list of patient birthdays. On their special day, email your video message that includes an acknowledgement that they may not be able to celebrate in the way they normally would. But, that “your dental team think you are so great that you still should have a fantastic day!”

No need to make a fresh recording for every person. Record one with each Zoom participant holding a sign saying ‘Happy Birthday!’, ‘Many Happy returns!’, ‘Stay at home and have a great birthday!’. One could even be holding a birthday cake. 😊
